The Honorable Kevin Brady
Ranking Member
House Ways & Means Committee
1102 Longworth House Office Building
Washington D.C. 20515

Dear Chairman Pallone, Chairman Neal, Ranking Member Walden, and Ranking Member Brady:

As the number of U.S. coronavirus cases continues to increase, we are writing to urge you to expedite consideration of H.R. 6218, the *Preserving Patient Access to Home Infusion Act*, to ensure Medicare patients have access to home infusion medications during this time of critical need.

Given recommendations from the Centers for Disease Control and Prevention that patients with underlying health conditions should avoid exposure to healthcare facilities, ensuring access to home-based care is more important than ever. Home infusion therapy keeps high-risk patients with serious infections, heart failure, immune diseases, cancer, and other conditions out of institutional settings and allows them to receive treatment at home.

This legislation provides important clarifications to the *21st Century Cures Act* that will ensure Medicare recognizes the full spectrum of professional services provided in home infusion — including the extensive pharmacy services that minimize the need for face-to-face interactions and are integral to safe and effective treatment. This will enable the delivery of infused medications in patients' homes, protecting those with underlying health conditions from the risk of disease, relieving burden on hospitals, and creating savings for patients and taxpayers.

As public health officials urge vulnerable patients to avoid health care facilities such as hospitals and nursing homes to avoid exposure to COVID-19, the value of home-based care has never been so clear. We urge your Committee to advance H.R. 6218 as urgently as possible.

Thank you for your consideration of this vital legislation. We look forward to working with you as this moves forward.

Dear Chairman Grassley and Ranking Member Wyden:

As the number of U.S. coronavirus cases continues to increase, we are writing to urge you to expedite consideration of S. 3457, the *Preserving Patient Access to Home Infusion Act*, to ensure Medicare patients have access to home infusion medications during this time of critical need.

Given recommendations from the Centers for Disease Control and Prevention that patients with underlying health conditions should avoid exposure to healthcare facilities, ensuring access to home-based care is more important than ever. Home infusion therapy keeps high-risk patients with serious infections, heart failure, immune diseases, cancer, and other conditions out of institutional settings and allows them to receive treatment at home.

This legislation provides important clarifications to the *21st Century Cures Act* that will ensure Medicare recognizes the full spectrum of professional services provided in home infusion — including the extensive pharmacy services that minimize the need for face-to-face interactions and are integral to safe and effective treatment. This will enable the delivery of infused medications in patients' homes, protecting those with underlying health conditions from the risk of disease, relieving burden on hospitals, and creating savings for patients and taxpayers.

As public health officials urge vulnerable patients to avoid health care facilities such as hospitals and nursing homes to avoid exposure to COVID-19, the value of home-based care has never been so clear. We urge your Committee to advance S. 3457 as urgently as possible.

Thank you for your consideration of this vital legislation. We look forward to working with you as this moves forward.
