Personal Health Experience Stat Sheet

Choosing a healthcare plan can be very confusing. There are many things to consider; two of the most important are cost and benefit design. When trying to determine your potential out-of-pocket (OOP) costs, it is important to determine which benefits you (and your family, if you are all on the same policy) typically use and how often you use them. This will help you project your out-of-pocket costs for the upcoming benefit year. The easiest way to do this is to ask yourself the following questions:

In the past 12 months, I have:

1. Visited my primary care physician
   - Spent $ _______________ in out of pocket costs (OOP)
   - a) Spouse has visited his/her primary care physician
      - Spent $ _______________ (OOP)
   - b) Child(ren) have visited their primary care physician
      - Spent $ _______________ (OOP)

2. Been seen by a specialist

   - Spent $ _______________ (OOP)
   - a) Spouse
      - Spent $ _______________ (OOP)
   - b) Child(ren)
      - Spent $ _______________ (OOP)

4. Purchased _______________ prescriptions (including for my family) at my local pharmacy.
   - a) What was the name of the medication(s)?
   - b) Was it recurring (or maintenance) medication or was it for a one time use?

5. Number of immunoglobulin therapy treatments _________________
   - IV or SC?
   - Spent $ _______________ OOP

6. Been admitted to a hospital for an overnight stay
