Young Adults

Questions to Ask While Evaluating a Physician or Facility

Prior to scheduling an appointment:

1. Do you accept my insurance?
2. Do you diagnose and treat patients with primary immunodeficiency diseases? (If already diagnosed, name the specific primary immunodeficiency disease.)
3. How many patients with primary immune deficiency diseases are treated at your facility?
4. For individuals receiving Ig replacement therapy:
   • Do you prescribe intravenous immunoglobulin (IVIG) and subcutaneous immunoglobulin (SCIG)?
   • Do you prescribe more than one brand of immunoglobulin?
   • Do you offer patients receiving IVIG the option of receiving their infusion in a medical or home setting?
