Personal Health Experience Stat Sheet

Choosing a healthcare plan can be very confusing. There are many things to consider; two of the most important are cost and benefit design. When trying to determine your potential out-of-pocket (OOP) costs, it is important to determine which benefits you (and your family, if you are all on the same policy) typically use and how often you use them. This will help you project your OOP costs for the upcoming benefit year. The easiest way to do this is to ask yourself the following questions:
